

Catawba County Emergency Medical Services

Wheel Chocks

This policy applies to all Freightliner vehicles still in use by Catawba County EMS and outlines required procedures by those employees operating said vehicles.

- All Freightliner EMS vehicle operators are responsible for ensuring that wheel chocks are placed under the rear driver's side wheel ANYTIME the ambulance is parked.
- These chocks will be stored in the left driver's side outboard compartment of each Freightliner ambulance when the vehicle is in operation.
